FARM PROFIT THROUGH BALANCED NUTRITION

## Nutrimin - The Most Economical Drench

Mineral deficiencies and imbalances are likely to occur during the course of a growing season and provide the farmer an explanation for the reasons why stock performance does not meet expectations.

This is when **Nutrimin** is the answer. The finest mineral drench available to farmers. Designed to target commonly deficient nutrients that are vital for maximizing your animals' production.

Of the many nutrient supplement options available to the farmer today, **Nutrimin** stands in a class of its own.

\* **Nutrimin** is Australian made and on the basis of recent large scale production trials has been reformulated.

\* **Nutrimin** employs a unique Chelation process to protect nutrients from being lost.

\* **Nutrimin** is truly economical. It is the higher absorption rate which ensures that farmers investment meets the nutritional requirements of their livestock.

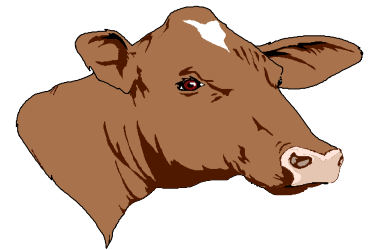

\* **Nutrimin** is now available for \$190.40 (R.R.P.) per twenty litre container.
