

Vigor-Lig Plus

The Balanced Liquid Fertilizer

Description

Vigor-Lig Plus is a balanced nutrient liquid fertilizer that incorporates both macro and micro nutrients suitable for leaf or soil feeding of a variety of crops such as Field Crops, Vegetables, Fruits, Nurseries, Pasture and Turf.

What are the benefits of Vigor-Lig Plus?

- An organic lignosulphonate chelated product which results in greater foliar absorption and utilization, as well as providing protection to trace elements from becoming unavailable to the plants' roots by adverse soil conditions.
- A very cost effective liquid fertilizer containing a complete range of nutrients.
- Vigor-Lig Plus is the optimum product to correct a few or all nutrient deficiencies in order to safeguard the vigor of pastures or yield of crops.
- Compatible with a wide range of agrichemicals.

For more information on the usage of this product please contact Agmin on the details below.

General Application Rates

- **Slight Deficiency (Maintenance):** 4.0 L/Ha
- **Moderate Deficiency:** 7.0 L/Ha
- **Severe Deficiency:** 10.0 L/Ha

The application rates above are guidelines. Agmin always recommends consultation with your local agronomist to base the application rates on soil and plant tissue testing, paddock history, environmental factors, soil conditions, and crop type. For more information on these topics please see Agmin's brochure marked "Foliar Nutrients".

Constituents

Minimum Guaranteed Analysis

Nitrogen (N)	10.2	% w/v
Phosphorous (P)	2.00	% w/v
Potassium (K)	7.00	% w/v
Sulphur (S)	0.50	% w/v
Magnesium (Mg)	0.50	% w/v
Copper (Cu)	0.025	% w/v
Zinc (Zn)	0.025	% w/v
Manganese (Mn)	0.075	% w/v
Cobalt (Co)	0.012	% w/v
Molybdenum (Mo)	0.010	% w/v
Boron (B)	0.052	% w/v
Iron (Fe)	0.030	% w/v

with lignosulphonate binder; surfactants; penetrants.

The Agmin Benefit

Agmin is at the forefront of research and development of chelated (protected) liquid nutrient fertilizers. The efficacy of foliar absorption of fertilizer elements is targeted to be optimized by binding agents assisting in rain fastness, penetrants to open increased number and area of pore sites, and surfactants to reduce surface tension of liquid droplets on plant surfaces. The formulations development is to prevent the greatest financial losses in fertilization, that is, the fixation of soil nutrients by adverse soil reactions. Agmin is committed in delivering quality products with high nutrient absorption and utilization for increased crop productivity and profit.
